

AFPROPS

---

*Mr Nicolas Lyle*

Afprops is a Pan-African property development company with a focus on retail property development in Nigeria. Afprops differentiates itself through its unique partnership with a major regional retailer that is laying the foundations for successful retail developments. This competitive advantage is underpinned by our extensive network of professional affiliations with both South African and Nigerian firms and experience in Lagos, Abuja and Ibadan. Afprops has combined experience in fundraising for REITs in Europe's capital markets and property development in Africa. As a result, they distill the apparently murky and complex universe of property development in Sub Saharan Africa into clear and simple investment principles and processes that are relevant to global real estate investors. Their services include local site introductions turnkey to fully packaged investment propositions in several countries. Afprops understand investment needs and local real estate development frameworks and processes and is therefore uniquely placed to be the conduit of choice for global real estate investors into institutional grade African Real Estate.
